

THE UNIVERSITY
of ADELAIDE

Honours Handbook 2023

School of Economics and Public Policy

**make
history.**

Welcome!

Congratulations! If you are reading this then you have been admitted to the Honours program of the Bachelor of Economics, or you are interested in applying for admission.

An Honours degree will set you apart from your undergraduate classmates, and you are in the right place to undertake it. An Honours degree in Economics is comparatively rare, and at the University of Adelaide you have the prestige of one Australia's Group of Eight universities behind you.

This handbook aims to provide you with information about the Honours year, what you can expect as an Honours student and what will be expected of you.

Associate Professor Mandar Oak
Honours Program Coordinator

1. The basics

The Honours Degree in Economics is a one-year program of full-time study designed to provide thorough research training. The program is targeted at students who wish to undertake further education at the Master and Doctorate levels or wish to pursue research-intensive careers in the departments and agencies of federal and state governments (the Treasury, the Reserve Bank, Productivity Commission), and in the private sector (finance or consulting).

The program comprises coursework worth 15 units and a thesis equivalent to 9 units. It also incorporates maths revision and a library workshop in preparation for the year's work. Through most of the year, you will also be required to attend a thesis workshop (schedule to be announced).

1.1. What's so special about Honours?

Admission into Honours is a selective and competitive process. (See the section on Eligibility for further information.) If you are admitted to the Honours year, we already think you are special:

- You have excelled in your undergraduate studies
- You have enjoyed Economics enough to want to take it to the next level
- You are serious about a commitment to a rigorous and challenging year of study.

Employers also know that completion of an Honours year is special. It demonstrates that you:

- Have the perseverance and self-discipline to succeed in a year of major challenges
- Have the ability to complete advanced coursework
- Have the skills to independently formulate and research a problem
- Have the ability to bring together the concepts and knowledge you have acquired in your undergraduate degree to apply them in a substantial piece of work – your thesis.

The thesis is more than just a very long essay. While working on your thesis you will find a whole new world of thinking where finding the right questions is almost as important as finding the answers to them; where logic, systematic development of argument and attention to detail are more important than ever before; and where independent and creative approaches to ideas are highly valued. If you enjoy your thesis work, and want to go on to further research, then a good Honours result provides a pathway to PhD study.

Lastly, it is a year in which you will develop new kinds of relationships with others. Honours cohorts are relatively small and you will likely find yourself giving and receiving support and friendship from your Honours colleagues. You will also develop a special relationship with your thesis supervisor.

Sometimes, professional connections are formed that last a lifetime. We hope that at least one of those connections will be with the School of Economics and Public Policy at the University of Adelaide.

1.2. What you can expect from the Honours year

Any Honours graduate will tell you about the long hours, the high demands of advanced level coursework, the pressure of the final weeks of thesis writing and quite probably the nervousness preceding the oral defence. The Honours year is an extremely challenging one. However, where challenges lurk so do rewards. The expected returns to an appropriate allocation of effort during the Honours year include the following:

- You should have increased confidence in your subject material, in presenting it and the satisfaction of mastering it
- You will have an opportunity to work with and learn from an experienced researcher – most of our academics have published in world ranking journals
- You should lift your understanding of economics to a higher level – Honours is much more than the facts and ideas of undergraduate level
- You will be exposed to a wider, more sophisticated set of economic ‘tools’
- You will have a chance to win one of our Honours prizes – a financial reward as well as a personal one!

2. About us

2.1. The School of Economics and Public Policy

The School of Economics and Public Policy at The University of Adelaide currently employs a vibrant group of 53 academics and researchers drawn from across the world. The School offers Bachelor, Honours, Masters and PhD programs. Our academics' research interests range across a broad spectrum including applied and theoretical microeconomics, macroeconomics, political economy, economic history, health, trade and econometrics.

When you graduate with an Honours degree in the field of Economics you will become part of a long and proud tradition. It was in 1901 that an Honours year in the field of 'History and Economics' was first offered at the University of Adelaide. But in 1901, the course fees for £10/10/-, plus £3/3/- for the examination!

Our distinguished Honours alumni include the current Deputy Governor of the Reserve Bank of Australia, Guy Debelle (1988), and the Chief Economist of BetaShares, David Bassanese (1987).

2.2. Key Contacts

Role	Name	How they can help
Honours Program Coordinator	Associate Professor Mandar Oak Room 3.37 mandar.oak@adelaide.edu.au Extension 31172	The coordinator's role is to co-ordinate the overall program direction and keep an eye on the progress of each student. Mandar will help with academic issues, offering advice and support where needed.
ABLE student success team	askable@adelaide.edu.au	The ABLE student success team will help you with administrative issues such as enrolling and routine procedural advice and support.

2.3. Academic Staff - Economics*

Name	Alma mater	Field(s) of research interest
Peter Draper	PhD (Hons.Causas) (Friederich Schiller University)	Public Economics, Taxation, International Tax, Applied Microeconomics
Raul Barreto	PhD (University of Colorado)	Macroeconomic Growth Theory; Resources, Real Exchange Rates & Corruption
Nadya Baryshnikova	PhD (Brown University)	Theoretical & Applied Econometrics, Microeconomic Applications
Ralph Bayer	PhD (London School of Economics)	Behavioural Economics, Experimental Economics & Game Theory
Mark Dodd	PhD (University of Adelaide)	Health Economics & Applied Microeconomics
Firmin Doko Tchatoka	PhD (Montreal UdeM)	Econometric Theory, Applied Econometrics & Statistics
Qazi Haque	PhD (University of Adelaide)	Macroeconomics, Econometrics
Benedikt Heid	PhD (University of Munich)	International economics, Trade and investment policies, Labour market consequences of globalization, Informal employment, Evaluation of trade agreements, Foreign direct investment, Spatial econometrics
Virginie Masson	PhD (University of Pittsburgh)	Evolutionary Game Theory, Game Theory, Networks
Stephanie McWhinnie	PhD (University of British Columbia)	Natural Resource & Environmental Economics
Kostas Mavromaras	DPHil (University of York)	Labour Economics, Public Policy, Health Economics
Mandar Oak	PhD (Cornell University)	Public Economics, Political Economy, Applied Microeconomics
Paul Pezanis-Christou	PhD (EUI)	Experimental & Behavioural Economics, Applied Game Theory
Florian Ploeckl	PhD (Yale)	Economic History
Yaping Shan	PhD (University of Iowa)	Industrial Organization, Microeconomics,
Sarah Wheeler	PhD (University of South Australia)	Environmental Economics; Agricultural Economics; Water Economics; Public Policy
Jacob Wong	PhD (University of British Columbia)	Macroeconomics
Duygu Yengin	PhD (University of Rochester)	Fair Allocation, Matching, Coalitional Game Theory, & Political Philosophy

* Not all academic staff are available every year to supervise Honours students.

3. Eligibility

Candidates must complete the requirements for the Bachelor of Economics, Bachelor of Economics (Advanced) or Bachelor of Finance (or its equivalent) at a high overall standard of performance. The courses taken for the degree should include:

- ECON 1010 Introduction to Mathematical Economics (Advanced) I
- ECON 1011 Quantitative Methods for Economic Analysis I
- ECON 2504 Intermediate Econometrics II
- ECON 2506 Intermediate Microeconomics II
- ECON 2507 Intermediate Macroeconomics II
- ECON 3502 Econometrics III
- ECON 3519 Advanced Mathematical Economics (only applies if this has been run in the relevant year)

The typical profile of a successful honours program applicant consists of high credit grades in the courses listed above.

Applicants from other institutions will be admitted subject to their preparation being judged equivalent to that applying to University of Adelaide students.

The honours program is designed for 'total immersion' in economics for the year. Part-time enrolment is possible, but not normally permitted unless the student is in full-time employment.

4. Structure of the program

4.1. An Overview

Semester 1	ECON 4011 Microeconomic Theory IV(H)	3 units	Dissertation
	ECON 4012 Macroeconomics IV(H)	3 units	
	ECON 4014 Econometrics IV(H)	3 units	
	Field course (see below)	3 units	
Semester 2	ECON 4010 Honours Economics	9 units	
	Field course (see below)	3 units	
		Total 24 Units	

For Semester 1 2023 the field course is:

- ECON 4015 Public Economics IV (H)

For Semester 2 2023 select one field course from the following list:

- ECON 4008 International Trade IV (H)
- ECON 4007 Economic Development IV (H)

4.2. A Little More Detail...

ENROLMENT	No more than 12 units may be taken in one semester.
	<p>Students must familiarise themselves with the requirements of each coursework course, as per the relevant Course Outline and Course Planner.</p> <p>In Semester 1 students will enrol in:</p> <ul style="list-style-type: none"> • 3 core courses <ul style="list-style-type: none"> ECON 4011 Microeconomic Theory IV(H) ECON 4012 Macroeconomics IV(H) ECON 4014 Econometrics IV(H) • Plus the following field course <ul style="list-style-type: none"> ECON 4015 Public Economics IV(H) <hr/> <p>In Semester 2 students will enrol in:</p> <ul style="list-style-type: none"> • Core thesis component <ul style="list-style-type: none"> ECON 4010 Honours Economics Thesis • Plus one of the following courses <ul style="list-style-type: none"> ECON 4008 International Trade IV (H) ECON 4007 Economic Development IV (H)
LIBRARY RESEARCH WORKSHOP (compulsory)	<p>The Economics Research Librarian will run a library research session on Friday 24 February, 11:00am – 12:00 noon in Marjoribanks 128, Level 1, Nexus 10 Building.</p> <hr/> <p>This will be a brief overview on:</p> <ul style="list-style-type: none"> • Endnote bibliographic software – why, access and training • Searching techniques • Choice of databases / search engines • Locating full text - or - use the Document Delivery Service • Alerting services – to stay up to date • Locating highly cited articles for your literature review • Help information on referencing and finding, and writing, theses • Help information on research methodologies etc.
THESIS WORKSHOPS	<p>Students must also attend a thesis workshop throughout the year.</p> <hr/> <p>This is organised to assist with the selection of a topic and thesis design, and to provide information and assistance on sources of economic data, statistical packages, contacts, etc.</p>
THESIS	<p>You may hear people refer to the terms 'thesis' and 'dissertation'. In this School these terms are used interchangeably.</p> <hr/> <p>You will be working on your thesis throughout the year, with increasing intensity peaking in Semester 2.</p>

There are interim milestones, all of which should be met:

Tuesday 24 April: Thesis topic submission to supervisor and Honours Program Coordinator

Week 1, Semester 2 (24 July – 28 July): Mid-year thesis presentations held during this week

Friday, 4 August: Last day for submitting thesis proposal to supervisor

Friday, 13 October: Draft of thesis submitted to supervisor

Friday 27 October, 12 noon: Final version of the thesis must be submitted (emailed as attachment).

Monday, 20 – Friday, 24 November: Final Presentation of Honours Thesis - Oral Defence

5. The thesis

5.1. Thesis Topic and Supervision

In choosing a topic you should consult with the members of the academic staff whom you consider the most appropriate for supervision of your thesis, and with the Honours Program Coordinator. Topics that would require significant School research fund expenditure may not be approved. As soon as possible, you should have a firm thesis title, an outline of the thesis structure, a good notion of the relevant literature and the essential data and its availability.

A one-page statement of a thesis topic and the nomination of a supervisor (with approval from the supervisor) should be submitted to the Honours Program Coordinator and the supervisor no later than 24 April, 2023.

While many students may not be familiar with certain academic staff members students are encouraged to contact potential supervisors in order to determine whether a potential match is feasible. Once you have identified a supervisor, you should establish supervising arrangements: how often to meet; what to bring to meetings; student's initiative to set up meetings and to keep them; what your supervisor expects of you. Detailed advice on supervisory arrangements are described on page 18 of the handbook.

5.2. Mid-year Thesis Presentation

The mid-year thesis presentation will be held in week 1, Semester 2. Each student is expected to give a 15-minute presentation outlining his or her thesis proposal to the class and academic staff. The presentation is followed by a 10-minute discussion during which academic staff attending the presentation will provide feedback to the principal supervisor and student.

5.3. Thesis Proposal

A detailed research proposal should be submitted to the supervisor for a review no later than Friday week 2 of Semester 2. The principal supervisor will then meet with the student to discuss.

The proposal must not exceed 5 pages. It should be clear and concise and contain the following parts:

Background: A brief description of the general area of research that you intend to concentrate on. The description should lead to a concise statement of the specific research question that you are interested in.

Research Question: A concise statement of your research question and discussion of why it is of interest to other economists.

Proposed Methodology: The methodology that you will adopt to develop your results.

The methodology that you will adopt to approach and address the research question.

Expected Results: In this section you should tie your results in with the first section. You should indicate what it is that you expect to find.

5.4. Final Thesis Draft

A draft of the thesis should be submitted to the principal supervisor no later than 13 October, 2023. While it is understood that progress on the thesis will continue until the submission date, it is recommended that a working draft be submitted to the supervisor so that the supervisor can form an estimate of the work that still needs to be completed for the thesis to be acceptable for submission.

It is important to submit sections of your draft progressively to your supervisor throughout the final semester so that he or she has time to offer comments and advice and you have time to amend your work.

5.5. Thesis Submission

An electronic version of the thesis (preferably in PDF) must be submitted to the Honours Administrator by Friday 27 October, 2023, at 12 noon.

Any thesis submitted after the deadline will be considered late. The penalty will be 10 marks out of 100 for every day which elapses after the submission date. This includes weekends.

5.6. Final Thesis Presentation (Oral Defence)

Final thesis presentations are expected to be held 20 - 24 November, 2023, after the Semester 2 examination period. Each student is expected to give a 15-minute seminar presentation on his or her thesis to the examination panel. The student will then be asked to spend a further 10 minutes responding to questions put forward by the examiners. Presentation and questions combined should take no longer than 25 minutes. The committee will then grade the presentation. This presentation grade will form part of the overall thesis grade.

5.7. Thesis Format

The suggested word count of the text of the thesis (including footnotes but not including references) is between 8000 and 12000 words. Marks may be deducted for excessive length. A statement of the word count must be shown at the start of the thesis e.g. on the title page, or in the abstract.

The title page should show: the title in full; the full name and degrees of the candidate; the School in which the candidate submitted the work; the degree for which the thesis is submitted; and the date of submission of the thesis. For example: 'Submitted to the University of Adelaide, School of Economics and Public Policy as partial fulfilment for admission to the Honours degree of Bachelor of Economics.'

The text of the thesis should be preceded by a brief abstract indicating the aims, scope and conclusions of the thesis. The abstract should not exceed one page.

The thesis should have a Declaration page (signed and dated) with the following paragraph:

"Except where appropriately acknowledged this thesis is my own work, has been expressed in my own words and has not previously been submitted for assessment."

It is also requested that your thesis be made available for reference by future Honours students by having it included in our digital database. Therefore, the following paragraph may also be included (signed and dated) on the declaration page.

"I hereby give permission for the digital version of my thesis to be made available on the web, via the University of Adelaide digital research repository, library search and also through web search engines, unless permission has been granted by the University to restrict access for a period of time."

The thesis should contain a bibliography. The bibliography should include only those works which you have actually consulted yourself; it is not to be simply a list of books or journal articles well known in the field. The recommended system of referencing is the author-date (or Harvard) system.

A hard copy of the thesis must be typed double (or one and a half) spaced on A4 paper, single sided with a good margin. Hard copies must be bound in some form. The School of Economics and Public Policy staff are not able to bind theses, but can provide advice on where this may be done.

It is mandatory to acknowledge the source of particular facts, arguments, and quotations by careful footnoting. Failure to acknowledge the sources will be penalised.

The standard of English expression is expected to be high. While supervisors will offer reasonable assistance, the writing and proofreading of a thesis is your own task.

You should strive for a thematic development in the thesis. It should always be apparent to the reader that the thesis is progressing as directly as possible to its logical conclusion. While each thesis topic will require treatment constrained by that topic, there are nevertheless minimum standards which must be met in thesis construction. A thesis would nearly always include, in addition to the exposition of the central issue examined in it:

- An introduction that includes a statement of the objectives of the work and techniques to be employed, and a short summary of the conclusions reached.
- A concise discussion of those aspects of the literature that are directly relevant to the thesis. In the unlikely event that there is no relevant literature, this chapter should explain why this is the case. This chapter should explain your methodology and research initiative, and contain some original thought.
- Where data manipulation is an important part of the work, an assessment of the data sources and any deficiencies.
- A brief summary and conclusion.

5.8. Honours Thesis Assessment

The Honours Thesis course is graded in two parts:

- The written component comprises 80% of the final grade.
- Oral presentation comprises 20% of the final grade.

A panel of two examiners will be assigned to assess each student's thesis. Examiners will be nominated by the Honours Program Coordinator based on recommendations from the student's supervisor.

The Honours Program Coordinator will contact potential internal examiners who will generally be members of the School of Economics and Public Policy.

The two examiners will return a grade out of 80 for the written component (a Grading guideline sheet will be provided)

- Final grade out of 80 derived from the average of the two grades.

The examiners will have 10 days to return their grade to the School of Economics and Public Policy Honours Administrator.

The same two examiners will attend the oral presentation and grade the oral defence presentation. The oral presentation will be open to all academic staff and they are welcome to ask questions about the research topic.

- Final grade out of 20 derived from the average of the two grades.

5.9. Milestones

Week 2 Semester 1, (March 6-10) Honours Program Coordinator to outline the thesis assessment process at the Honours Workshop. Students begin to plan their research topics.

Week 4, Semester 1 (March 20-24) Student presentations to Academic staff (date to be announced).

Week 5, Semester 1 (March 27-31) Students to contact potential supervisors and/or staff to contact students to match supervisors.

Week 7, Semester 1 (April 24) Students to submit thesis topic to supervisor and Honours Program Coordinator.

Week 1 Semester 2 (July 24-28) Mid-year thesis presentation: Supervisors to recommend at least three examiners per thesis to the Honours Program Coordinator.

Week 5, Semester 2, (August 21-25) Supervisors to re-confirm examiners to Honours Program Coordinator.

Weeks 7-9, Semester 2 (from September 4) Honours Program Coordinator to contact and finalise the list of nominated examiners.

Friday Week 10, Semester 2, (October 13) Students submit draft thesis to supervisor. Supervisor provides feedback to the student.

Friday, Week 12, Semester 2 (October 27) final Thesis submission. Digital copy submitted by 12 noon. A period of 10 days allocated to marking. Final results for the written component of thesis grade (80%) submitted to the Honours Program Coordinator by close of business Friday November 10.

November 20-24 Honours thesis final oral defence presentations. Presentations should be no longer than 15 minutes + 10 minutes question time. Presentations will be assessed by a panel of two examiners. The examiners must return their grade for the oral defence presentation to the School of Economics and Public Policy Honours Administrator by **5pm** of the same day.

30 November Honours results released.

6. Assessment

6.1. An Overview

- In order to obtain an Honours degree, a student must obtain at least a pass result in each of the core courses and the thesis.
- A student who fails to pass the Level IV Macroeconomics, Microeconomics or Econometrics on their first attempt may, on academic grounds, be offered Additional Assessment. This will most likely be in the form of a new exam (Additional Assessment) and will have the same weight as the original exam. If, after replacing the original exam mark with the new exam mark, it is calculated that the student has passed the course, they will receive 50 Pass as their final result for the course (no higher) but if the calculation totals less than 50, their grade will be Fail and the higher of the original mark or the mark following the Additional Assessment will be recorded as the final result. If a student fails to achieve a final grade of 50% the student is automatically prevented from completing the Honours program.

NB: Medical Certificates: The above comments notwithstanding, students are reminded that in the event of major illness the University requires them to present the necessary medical certificates to the Honours Program Coordinator as soon as possible after the examination or test. Retrospective certificates are not accepted. In relation to examination, students must comply with the 'Modified Arrangements for Coursework Assessment Policy' requirements. Please see <https://www.adelaide.edu.au/student/exams/modified-arrangements-for-coursework-assessment> for further details.

Students who are registered with the Disability Office need to ensure that they inform the Honours Program Coordinator and the Honours Administrator upon acceptance of their offer so that all teaching staff can be notified of special arrangements etc. in advance.

- Double-Counting. Students are reminded that substantially similar material cannot be submitted for assessment more than once in the program (that is, in courses and/or in the thesis).
- Results for individual courses will be awarded using M11-Honours Mark Scheme and these marks will be reflected on the academic transcript. The marks will also be visible on Access Adelaide.
- The final result in the Honour's year will be determined following the University's GS5 - Grade Scheme 5 - Honours. This result will also be reflected on academic transcripts.

6.2. Coursework Assessment

Please refer to the Course Outlines <https://www.adelaide.edu.au/course-outlines/> for further information on the structure and content of courses.

For further information regarding our Academic Honesty Policy, please refer here: <https://www.adelaide.edu.au/policies/230/>

7. Students and supervisors – a brief guide

The thesis is a significant part of the Honours program. It is highly valued by students but at the same time can be very stressful for them. To make this apprenticeship in research more valuable and less stressful, the following guidelines have been developed to assist you to obtain appropriate and consistent levels of supervision.

7.1. For Students

Please read the advice below for supervision.

- Students are to speak with academic staff at the School to identify a feasible Honours thesis topic and a thesis supervisor. Students are ultimately responsible for proposing the area and general idea behind the thesis. Your supervisor should assist you to define a topic and can provide help in advising when a topic is of a manageable size, and provide guidance on refining a broad idea into a precise question.
- Students are to inform the Honours Program Coordinator when they have identified an academic staff member at the School who is willing to undertake the Honours supervision. The Coordinator of the Honours program will assess the proposed arrangement and formally approve the supervisory arrangement. The final approval decision lies with the Coordinator and the Head of School.
- If students are unable to identify a supervisor, the Coordinator will make a recommendation to the Head of School to allocate a supervisor to each student. In making this recommendation, the Coordinator will take into account preferences expressed by both students and staff. However, he/she is not able to guarantee that preferences will be met. The Head of School will make the final decision.
- You would be expected to see your supervisor at least 2-4 times during Semester 1 and every other week after first semester exams (when you commence intensive work on your thesis), although more frequent meetings may be arranged if desired.
- It is strongly recommended you and your supervisor agree to the regularity of meetings and timelines and expectations regarding feedback and communication as soon as possible once topics and supervision has been confirmed. It is your responsibility to arrange (and keep) these meetings.
- Supervisors are requested to read the material handed to them. It is very helpful if you start to put ideas in writing as soon as possible - initially in point form.

7.2. For Supervisors

- Please read the advice for students, above.
- During meetings with your student you should:
 - suggest ways to make effective use of research time

- discuss the standard required of an Honours thesis
- be available for regular contact as reasonably and mutually agreed with you
- provide a constructive and critical assessment of any work submitted
- indicate areas of the literature which are relevant to your student; potentially useful techniques; and specific references to items of economic knowledge which have escaped his/her attention.
- When a student fails to meet with you over an extended period of time, please do one of the following:
 - Preferably contact the student and ask why (contact details may be obtained from the Honours Administrator). If they do not respond to this initiative, inform the Honours Program Coordinator.
 - If you are unwilling to contact the student, then ask the Honours Administrator to do this for you, sending a copy of the email to the Honours Program Coordinator.
- Supervisors are not **obligated** to persistently chase up a student who fails to keep (or make) appointments.
- You may point out sloppy or incorrect grammar or expression. However, it is not your responsibility to rewrite material for your student or put in large amounts of time to bring the work of a weak student up to scratch. (maybe rephrase the last bit as: put in large amounts of time to bring below-par research output up to scratch)

8. Life in the Honours year

8.1. Life Beyond Study

Before starting your Honours year, it's wise to have a refreshing holiday so that you commence in top form. Once you've started, try to achieve a balance between study and life beyond study, so if you can, keep up with any sporting activities etc. However, do not plan any other significant activities for the year.

8.2. Outside Work Commitments

Some Honours students seriously underestimate the workload of the Honours courses and thesis and find themselves over-committed to paid work - whether tutoring for the School, other work for members of the School or affiliated centres, or non-university employment. It is your responsibility to monitor your capacity to do Honours together with other work. Most full-time students find they cannot cope with more than a few hours outside work per week, such as two tutorial classes (five hours work).

Outside work commitments will not be accepted as grounds for deadline extensions or other special consideration.

8.3. What We Expect of You

- Commitment to your studies
- Development and application of your own ideas
- Willingness to take a risk and push beyond your comfort zone
- To be completely self-monitored, self-driven, and self-disciplined – the responsibility lies with you
- To devote on average 50-60 hours per week throughout the year to your studies.

8.4. What You Can Expect of Us

- Guidance and encouragement
- Honesty and constructive criticism
- To be available for regular, agreed meetings.

8.5. Financial Matters

Apply to be a tutor in the School of Economics and Public Policy. If you would like the opportunity to work as a tutor during your Honours year, make sure you provide a written expression of interest to the Honours Program Coordinator by the deadline as listed on the link below. We encourage applications from qualified and enthusiastic people with good teaching skills. Please note, the School strongly recommends that Honours students take no more than 2 one-hour tutorials per week during the

semester. You don't need to restrict your preferences to Level I courses, especially if you have done really well in a particular Level II or III course. You can find the application form at <https://economics.adelaide.edu.au/your-career-in-economics> and the current pay rates at <https://www.adelaide.edu.au/hr/salary-and-benefits> .

Keep an eye on the *University's Honours Scholarships* page for scholarships you might be eligible for: <https://scholarships.adelaide.edu.au/search/>

The Brian Gray scholarship is for domestic students and you may apply if you are in a full-time Honours program studying a topic of relevance to APRA. You can apply online via APRA's website. For further information including open and closing dates, please visit <https://www.apra.gov.au/brian-gray-scholarship-program> .

If you are a domestic student, you will have a *Commonwealth Supported Place* for your Honours year, and will have entitlements and pay contributions in the same way you did as an undergraduate. For more information see <http://www.adelaide.edu.au/student/finance/>

Some students may also be eligible for *Youth Allowance*. You are welcome to contact the Education and Welfare Officers at the Student Care Office on 8313 5430 to discuss your eligibility. See also <http://www.adelaide.edu.au/student/finance/> for more information.

Win one of our Honours prizes. While it won't help you during your Honours year, the School does offer a prize for the best Honours thesis and the best overall Honours achievement.

9. Summary of key dates

Subject to confirmation at the beginning of each semester

February 20-24	Orientation week Induction session/Library session
February 27	Semester 1 begins
March 20-24	Student presentations for academic staff
March 23	Final date for deferral of candidacy (also HECS census date for Semester 1)
April 24	Thesis topic submission to supervisor and Honours Program Coordinator
June 2	Semester 1 classes end
June 17	Examinations commence
July 24	Semester 2 begins
July 24 – 28	Mid-year Thesis Presentations (Week 1 of Semester 2)
July 28	Last day for submitting thesis proposal to principal supervisor
September TBC	Honours Prospective Student Breakfast
October 13	Draft of thesis submitted to supervisor
October 27	Semester 2 classes end
October 27	ELECTRONIC VERSION of the thesis MUST be Submitted in PDF format by 12 NOON on this date
November 4 - 18	Examinations for Honours courses
